

NP401(6) Discontinued and Out of Stock

Your order for NP401(6) can not be fulfilled as this volume has been discontinued.

Following the announcement in DU80/2010 and DU49/2010 that volumes of NP401 would be discontinued when stock has run out for each volume, volume 6 is now out of stock and no more orders should be placed.

The data contained in NP401(6) remains valid and can still be used. Remaining copies of this volume can still be sold.

Alternative options for sight reduction tables currently in the Admiralty range are NP303 Rapid Sight Reduction Tables, which can be offered to customers if you are unable to supply NP401. The table below identifies the alternative coverage:

NP 401 (tables to 0.3 of a nautical mile)	NP303 (tables to 0.5 of a nautical mile)
Volume 1: 0-15°	Volume 2: 0-40°
Volume 2: 15-30°	Volume 2: 0-40°
Volume 3: 30-45°	Volume 2: 0-40° and Volume 3: 39-89°
Volume 4: 45-60 °	Volume 3: 39-89°
Volume 5: 60-75°	Volume 3: 39-89°
Volume 6: 75-90°	Volume 3: 39-89°

NP303 volume 1 can be used in addition to the other volumes of NP303 or NP401 as it contains position, altitude and true azimuth of seven selected stars for the complete range of latitudes and hour angles of Aries. This arrangement provides, for any position and time, the best selection of seven stars available for observation.
