

SH 200 BS | BH

Searchlight Halogen for smaller vessels. Bridge operated short and high

Bridge operated halogen searchlights SH 200 BS/BH are intended for smaller tonnage, e.g. fishing boats, tugs and work boats. Built with corrosion resistant components, and designed for extreme marine environments which require minimum maintenance. Light weight and simple to mount, these searchlights provide reliable lighting in all kinds of temperatures. Drum of seawater resistant aluminium finished in white polyester coating and bracket of stainless steel. Black drum inside.

Highlights:

- Designed to meet applicable marine requirements, IP67
- Stainless steel front ring with snap coupling for easy replacement of lamp
- High quality seawater resistant aluminium housing finished in white polyester coating
